MIT, Manipal, Karnataka, Bangalore

EDUCATION

- Global Indian International School
  Grades 9-12
  2020-24
- ICAS, MAHE
  B SC. Computer Science
  2024-26

- **Data Science Certification:** Successfully completed the IIT Madras Certificate Program in Data Science and Applications (Foundation Level), establishing a practical base in data analysis.

SKILLS

- Programming: Proficient in C++, Java, and Python.
- Web & Database: Experience with SQL Server and deploying applications using XAMPP (MySQL database integration).
- Software & Tools: Competent in Data Science tools (Foundation Level) and specialized Editing Software.
- Soft Skills: Leadership, Communication, Creativity, Diligence, Proactiveness, and Punctuality.

LANGUAGES

English Telugu
Tamil Hindi

About Me

I am a driven Computer Science Major from ICAS, MAHE, currently completing my second year with a passion for Artificial Intelligence and an exceptional academic record (3.906/4.0 CGPA). I thrive on exploring new technical challenges, as demonstrated by my engagement in the Enigma Technical Society Research Division. Beyond academics, I've embraced campus leadership, serving as both Class Representative and Foreign University Facilitation Secretary, which highlights my commitment to both my peers and the twinning program. I am eager to transfer my strong foundation in C++, Java, and Python to a global university setting, with the ultimate goal of combining my technical expertise with entrepreneurial ventures.

ACHIEVEMENTS

- Top Academic Performance: Consistently ranked among the top students, achieving 3rd Class Topper in Semester 1 **(3.72 CGPA)**, 2nd Class Topper in Semester 2 (**4.0 GPA, 3.86 CGPA)** and 1st Class Topper in Semester 3(**4.0 GPA, 3.906 CGPA**).
- Consistent High School Excellence: Awarded Scholarship in Grade 11 and 12; secured **94.8% (Grade 10)** and **92.6% (Grade 12)** in CBSE examinations.
- International Recognition: Achieved **International Rank 9** in the International English Olympiad (IEO).
- Subject Expertise: Recognised as **Biology Topper** and Second Place overall topper in Grade 11.

PROJECT

Online Doctor Appointment System Website
Goal: Developed a complete web-based system to streamline appointment booking and scheduling for clinics.
Technical Implementation: Utilised XAMPP (Apache, MySQL) to build the platform, demonstrating fundamental full-stack capabilities.
Key Achievement: Designed and implemented the underlying MySQL database structure for efficient management of user registration, doctor credentials, and appointment scheduling logic.
